Dairy Calf Club Field Day

The Dairy Calf Club Field day, which was to be held at Olds Agricultural School, on June 19, has been postponed on account of the Beef Calf Club sale which is to be held at Carstairs on that day.

The field day will now be held on Saturday, June 26.

Four dairy calf clubs will take part in the field day, Didsbury, Lynden, Olds and Bowden.

Dean Ragg Elected Bishop of Calgary

The Very Rev. Harry Richard Ragg, Dean of Calgary, today was elected Bishop of Calgary, to succeed Most Rev. L. Ralph Sherman, Archbishop of Rupert's Land.

There were sixteen nominees for the position on the first nominating ballot, but five of these withdrew, leaving a slate of eleven.

Dean Ragg missed election on the first ballot by one vote only, and the balloting was carried to a second ballot, when he was given an overwhelming majority of both clergy and lay votes.

Engagements

Mr. and Mrs. L. J. Wigglesworth announce the engagement of their youngest daughter, Mary Louise, to Merrill L. Himmelreich, of Calgary, second son of Mrs. Mary Himmelreich, of Carstairs. The wedding will take place in the Evangelical Church, July 10, at 2:30 p.m.

Mr. and Mrs. E. A. Deadrick announce the engagement of their elder daughter, Mildred Clarice, to Walter A. McInnes, elder son of Mr. and Mrs. A. L. McInnes. The wedding will take place in the Evangelical Church, July 10, at 2:30 p.m.

Mr. and Mrs. E. L. St. Clair, of Didsbury, announce the engagement of their eldest daughter, Margaret Aileen, to A. E. Roy Templeton, son of Mrs. Gertrude Templeton and the late Mr. C. M. Templeton of Acme. The wedding will take place the latter part of June.

Plan United Front for Alberta Vote

The Independents, Liberals and Progressive Conservatives will present a united front when the next general election is held in Alberta. The three groups also will unite to name a candidate at the Calgary by-election later on in the year.

The union of the three groups so far as provincial politics is concerned was affected in Calgary on Saturday evening, when a convention of Alberta Liberals, by an overwhelming majority, voted to lineup with the Independent Citizens' Association of Alberta at the next provincial election.

A similar stand had previously been taken by the Progressive Conservatives.

The Liberals passed the following resolution, outlining their stand:

"That the council of the Alberta Liberal Association take immediate steps to co-operate with all other parties opposed to the policies of the present provincial government, through the offices of the Independent Citizens' Association and to that effect appoint a committee of seven members to meet a similar committee of the Independent Citizens' Association."

Atlas Lumber Yard Changes Manager

A change in the management at the local Atlas Lumber Company's yard was made last week, when Mr. David Muir of Tilley, Alberta, took over from W. Turnbull.

Mr. Muir has been with the company since 1935, starting in the Medicine Hat yard, and for the past fifteen months was manager at Tilley.

Mr. Turnbull resigned his position to go into business for himself in a general store at Airdrie.

United Church Notes.

On Sunday, June 20th, the minister, Rev. J. M. Fawcett, will give the closing message of his pastorate on the Didsbury Charge. Weather and roads permitting, services will be held at the usual hours at each point on the Charge.

At Knox church at 7:30 p.m., the girl's choir will also be heard in special numbers. You will be cordially welcomed at this farewell service.

Fair Date Set for July 21st.

At a meeting of the directors of the Didsbury Agricultural Society, the date for the Fair was set for Wednesday, July 21st.

Arrangements will be made with the Department of Agriculture for the appointment of judges, and judging will commence at 10:00 a.m.

Various committees and superintendents of departments for the fair were appointed, and a strong committee was appointed to arrange for a good afternoon of sports.

The following officials were appointed.

Manager, Sid O'Brien.
Prize list committee, J. E. Gooder, I. L. Klein and C. E. Reiber.

Finance and Advertising: Tom Morris and C. E. Reiber.

Concessions: C. E. Reiber.

Grounds: Sid O'Brien, B. T. Parker, Wm. Thurlow, I. L. Klein.

Sports: Jim Caithness, T. E. Scott, H. Lynch-Staunton.

Superintendents of Gates: W. W. Gillrie, Ed. Ford, W. McFarquhar.

Heavy Horses: I. L. Klein, H. E. Oke.

Cattle: Dairy—C. G. Leeson, Geo. Youngs.

Cattle: Beef—J. Francis, W. Thurlow.

Swine and Sheep: R. A. Gulliver.

Poultry, Grains, Grasses and Vegetables: B. T. Parker, D. N. McDonald.

Weddings

SNYDER-HOHN

Vegreville United Church was the scene of a pretty wedding on Wednesday, June 9, when Miss Eleanor Elizabeth, eldest daughter of Mr. and Mrs. L. Hohn, became the bride of Mr. Alfred B. Snyder, son of Mr. W. Snyder and the late Mrs. Snyder, of Didsbury. Rev. O. Snyder, brother of the groom, performed the ceremony, assisted by Dr. Armstrong.

The bride, given in marriage by her father, wore a two-piece ensemble of rose crepe with matching chapel veil, held by a halo of pink rosebuds. Her only ornament was a gold heart locket, gift of the groom. Her corsage was of cream roses.

Miss Vera Hohn, attending her sister as bridesmaid, wore a two-piece ensemble of navy and white, with corsage of red carnations.

Mr. Alton Snyder, brother of the groom, acted as best man, and Eric Gooding and Gus Mohr as ushers. Mrs. W. Clements played the wedding marches.

The happy couple left later for a short honeymoon to be spent at Sylvan Lake, after which they will return to Didsbury, where they will reside.

For her going-away costume, the bride chose a brown frock with beige coat, and beige and brown accessories.

Junior Beef Club Fair and Sale

West Didsbury Junior Beef Club, in conjunction with Calf Clubs from Carstairs, Madden, Cremona and Grainger, will hold a joint fair and sale at J. Munro's farm, one mile east of Carstairs, on Saturday, June 19.

With five clubs joining in the fair, greater interest will be brought in the competitions and with seventy calves entered in the sale, a greater interest will be created among the buyers.

Two Innisfail Stores Burned

Fanned by a stiff southeast wind, a fire, which started when a gasoline stove, being fixed by V. E. Burrows, exploded, completely destroying the Burrows hardware and the Badcock drug store in Innisfail, Wednesday afternoon.

The new Globe general store next door was protected by a two-foot fire wall, thus saving the rest of the block.

Both buildings were owned by W. C. A. Watt, and buildings and contents were covered by insurance. Much of the stock, however, will be unobtainable again until after the war.

Mr. Burrows suffered a badly burned right forearm when the stove exploded.

Red Cross Notes.

The Red Cross Work Committee feels that the moving of Dr. and Mrs. Fawcett from the district, will be a distinct loss. Both have helped greatly in the work, while Dr. Fawcett's contribution of very fine knitting was especially appreciated. We wish them success in their new field.

Didsbury Jottings

By A.C.H.

The I.O.D.E. met at the home of Mrs. Leila Hunsperger on Monday evening. Thirteen members were present and one visitor. It was decided to make regular monthly donations to Polish Relief. Also to collect used clothing. But more about that next week.

We noticed one of His Majesty's Navy in town. That's the kind of convoy we can appreciate. But I guess you have to be young and glamorous, or a shipment of dried milk and eggs to warrant that kind of protective companionship.

Knox United Sunday School contributed over \$10.00 towards the Greek Relief Fund. Good going Knox. Or should we say, "Good giving."

The way the grass grows beats us! No sooner do we get it down off again, than it is up, long again.

Grades one, two and three had a grand time at their picnic on Monday. The grand finale was an exhibition by a student pilot. He took the heads off the dandelions as he skimmed the ground; and had the girls in agonies of suspense as he dived and rolled. The boys thought it was as good as an episode from "The Men in Scarlet."

At an impressive open air camp fire meeting last night, Scoutmaster Don Mortimer invited six members of the 1st Didsbury Troop as Scouts. They were: Douglas Durant, Stanley Gole, Harold Klein, Gerald Gooder, Billie Ronnie and Clifford Johnson. Good luck, boys, and good scouting.

These boys are the patrol leaders and second of the troop.

Post-War Germany

ONE OF THE MOST VITAL post-war problems which will face the United Nations will be the regeneration of the German people. For over twenty years the press and radio of Germany, as well as the entire educational system have been controlled by the Nazis, and the affect of this on the mental outlook of a large part of the population has been profound. The task of persuading these people that they have been victimized by their leaders and that their whole ideology is distorted, will be a difficult one. It is clear that one way in which it will have to be approached is through the schools, and that the entire system will have to be revised to eliminate all traces of the Nazi influence. It has been suggested that this will have to be done under the supervision of the Allied Nations, and that German schools must accept a standard of education which will imbue the youth of that country with sound principles.

Propaganda Is Cleverly Used

The clever use of propaganda by the Germans has been recognized. Not only in Germany, but in the countries she has sought to conquer, this weapon has been used with consummate skill. Many Germans were, in the beginning, impressed with the aims of the Nazi party and sincerely believed that it was working in the best interests of their country. When they were drawn into the war, these people realized that the Nazi party was founded on lies and trickery, and they have long ceased to have any faith in their leaders. To these people will fall the task of informing their countrymen of the extent to which they have been deceived by the Nazis, and of convincing them of the many ways in which they have been misinformed. It will also be necessary for the United Nations to be prepared to release in Germany large amounts of propaganda, telling them the truth about the war and the events leading up to it, and proving to them the extent to which they have been duped by their leaders.

Problem Is Not A Simple One

So thorough has been the whole system of Nazi education, both in the schools and of the people as a whole, that the problem of breaking down all the principles they have taught is not going to be a simple one. Although many people in Germany must realize that they have been misled, there are no doubt many others, particularly of the younger generations, who will, until the end, maintain their faith in the Nazi party. These thousands of young people, whose outlook has been completely distorted, will be the most difficult to convince and to re-educate. No doubt post-war plans of the United Nations include a program for dealing with this problem and the time will come when the Germans will have learned that they are not a "superior" race, and that it is not their right to dominate weaker nations. When the German people have thoroughly learned these things there will be hope for permanent peace in Europe.

THIAMIN is also known as Vitamin B1 and it is important both for the nervous system and the digestive tract. It is most important to general health and morale, as has been recognized by the British Government, which pays out thousands of pounds a year for its addition to all flour and bread consumed in this country. Thiamin is easily destroyed by heat and it also dissolves in the cooking water, so one has to be very careful in the preparation and cooking of food to see that as little as possible is lost. NEVER throw away the water in which vegetables are cooked. It is valuable in soups and gravies. Whole wheat bread and whole wheat cereals contain thiamin and if you want to be sure you get sufficient of it add one or two teaspoonsful of wheat germ to your breakfast cereal. Do not cook the wheat germ with the cereal, but sprinkle it on top or mix it in after the cereal has been cooked. Wheat germ may also be added to flour for muffins or other pastry. To get enough thiamin everyone should eat a whole wheat cereal, preferably with the wheat germ added, and four to six slices of whole wheat bread every day.

RECIPE

Whole Wheat Muffins

1 cup brown sugar 1 cup buttermilk
2 tablespoons fat 1 egg
1 cup bran 2 tablespoons wheat germ
1 1/2 cups whole wheat flour 1 teaspoon baking powder
1/2 teaspoon soda 1/2 teaspoon salt

Cream fat and sugar; add egg, milk, bran, and the flour, sifted well with soda, baking powder and salt. Mix. Pour into well-greased muffin tins and bake in hot oven (425 degrees) for 25 minutes. Wheat germ should be added just before pouring into muffin tins.

ARABIC WORD EFFECTIVE

If Arab stevedores in a North African port set a record for moving cargoes in and out of Liberty ships, it can be credited, says the New York Times, to the Arabic vocabulary of Sergeant Pasquale Tango of New York. Sergeant Tango's Arabic is one word, used sparingly. The word is "zid." It means "more."

Soon there won't be any danger of anyone biting off more than he can chew. 2518

A COSTLY PET

LONDON—Food rationing makes it difficult to keep such pets as large dogs in Britain so there is a rush to have goldfish for pets and goldfish prices have risen until a good sized one sometimes costs as much as \$22.50.

AFFECTING BIRD LIFE

Britain's bird population is falling. The rigors of war both over the countryside and around the coast are causing heavy casualties among many of the most popular species.

Carry On Tradition

Group of Canadians in India Transporting Freight By Air Before the war, Canadians were carrying more freight by air than the people of any other country in the world, and today a small group of Canadians attached to the R.C.A.F. squadron in India is carrying on this tradition, said the R.C.A.F. news service.

The dispatch said the fliers are not veteran bush pilots but graduates of the combined training organizations, manning sturdy Hudsons which bear on their noses a flying elephant insignia.

They all say they don't like their jobs; they would rather be "fighting." They fly in a shirt, shorts, socks dragging to the ankles and often a pair of sandals, and they don't lock a bit like the picture of the intertidal airman in helmet, fur-lined flying suit, parachute and high boots.

But they are doing a job which not only the R.A.F. but also the naval and army high commands in India term a vital one. Carrying it out means piloting the comparatively slow, lightly-armed Hudsons into areas in which it isn't always healthy for a Hurricane or Mohawk to fly alone.

There is a daily run from an air-drome in Calcutta to landing strips and air bases almost in Burma. The landing strips are muddy or rice fields smoothed out "just a mite"; there are no paved runways at the battlefield, and the elaborate control tower of a fully-equipped air-drome gives way to a small bamboo hut with a radio set, a Vercy pistol and a red flag for equipment.

WINGS PARADE

R.C.A.F.-B.C.A.T.P.

LIST OF APPOINTMENTS The following airman have recently been commissioned in Canada. It was announced by Royal Canadian Air Force Headquarters:

Pilots
Sgt. J. N. Clark, London, Sask.
Sgt. R. B. Clark, Saskatoon, Sask.
Sgt. H. E. Stacey, Brandon, Man.
Sgt. J. H. Macdonald, Winnipeg, Man.
Sgt. W. D. D. Kennedy, Sask.
Sgt. H. J. Baker, Gravelbourg, Man.
Sgt. L. R. Moland, Prince Albert, Sask.
Sgt. J. E. Fries, Prince Albert, Sask.
Sgt. John Davids, St. Louis, Sask.
Sgt. R. H. Henson, Sask.
LIST OF GRADUATES
The following students graduated under the British Commonwealth Air Training Plan from:

No. 12 Service Flying Training School, Brandon, Man. (Pilots)—
LAC M. D. Smith, The Pas, Man.
LAC G. V. Hartley, Vancouver, Man.
LAC E. A. Harker, Toronto, Ont.
No. 3 Bombing and Gunnery School, Macdonald, Man. (Air Gunners)—
LAC G. C. Cook, Hines Creek, Alta.
LAC A. M. E. De Mille, Lacanville, Man.
LAC W. H. Eastmond, Sask.
LAC D. E. Horton, Humboldt, Sask.
LAC H. K. Richardson, Sask.
LAC G. R. Martin, Lehighville, Ont.
LAC H. W. Smith, Delta, Sask.
LAC J. L. Morgan, Fort Saskatchewan, Alta.
LAC D. B. Poney, Almonte, Ont.
LAC O. D. Bradburn, Lacanville, Man.
LAC B. J. Sullivan, Port Arthur, Ont.
LAC M. A. Wilson, Chalk, Sask.
LAC C. J. Walcott, Stony Beach, Sask.
LAC P. H. M. Stewart, Fern, Alta.
LAC A. E. Zabo, Moosehead, Sask.
LAC G. W. Stewart, Assiniboia, Sask.
No. 5 Bombing and Gunnery School, Dufur, Sask. (Wireless Air Gunners)—
LAC J. C. Harvey, Extonville, Alta.
LAC C. J. Leary, Grande Prairie, Man.
No. 7 Air Observer School, Portage la Prairie, Man. (Navigators)—
LAC G. W. Stewart, Assiniboia, Sask.
No. 7 Air Observer School, Portage la Prairie, Man. (Air Bombardiers)—
LAC J. L. Dwyer, Hines Creek, Sask.
LAC F. W. Heinen, Wilkes, Sask.
LAC A. J. Leck, Prince Albert, Sask.
LAC G. E. Shute, Vesper, Sask.
LAC A. W. Schindler, Saskatoon, Sask.
No. 1 Central Navigation School, Rivers, Man. (Air Navigators)—
LAC G. E. Sanders, Carleton Place, Ont.
No. 10 Service Flying Training School, Dauphin, Man. (Pilots)—
LAC A. R. Bick, Warlock, Man.
LAC L. J. Dwyer, Hines Creek, Sask.
LAC J. J. Dwyer, Hines Creek, Sask.
LAC W. A. Gardner, Gilbert Plains, Man.
LAC B. Hetherington, Kellogg, Sask.
LAC E. E. Hurlbut, Fort Saskatchewan, Alta.
LAC W. Leach, Minnedosa, Man.
LAC H. D. McPhail, Bunkend, Sask.
LAC J. E. Miller, Starnett, Alta.
LAC G. E. Glendon, Sask.
LAC A. S. Smith, Prince Rupert, B.C.
No. 5 Air Observer School, Winnipeg, Man. (Air Navigators)—
LAC W. H. Henson, Sask.
No. 5 Air Observer School, Winnipeg, Man. (Air Bombardiers)—
LAC W. H. Henson, Sask.
LAC A. W. Watson, Thumas, Man.
No. 7 Bombing and Gunnery School, Port Arthur, Ont. (Wireless Air Gunners)—
Sgt. W. C. Clark, Hines Creek, Sask.
Sgt. H. M. Dickie, Hines Creek, Sask.
Sgt. L. E. Erickson, Elk Lake, Sask.
Sgt. L. E. Foy, Hines Creek, Sask.
Sgt. H. C. Irvine, Waskasieu, Alta.
Sgt. D. J. Savard, Hines Creek, Sask.
Sgt. R. P. Strickland, Humboldt, Man.

The Walls Look Lovely!
ALABASTINE
Low Cost Water Paint for Walls and Ceilings!

SMILE AWHILE

A woman purchasing war bonds told the clerk:

"I've been saving this money to divorce my husband, and I can stand him better than I can Hitler."

.....

Doctor: "I want to change the death certificate I gave you yesterday."

Coroner: What is wrong?

Doctor: I put my name in the space marked "Cause of Death."

.....

He (on his knees): "Darling, I love you with all my heart, with all my soul, and with all the strength of my being."

She: "Are you in earnest?"

He (reproachfully): "In earnest? Do you think I'm haggling my trousers in this way for fun?"

.....

Browne was "phoning his wife from the office."

"Hello, dear," he said. "I'm very sorry, but I won't be home till very late tonight. I'm fire-watching."

"Oh, you are, are you," snipped his wife. "And who is the flame?"

.....

After the blackout the girl protested: "Ehbert, you shouldn't have kissed me like that, with all these people so close around us, even if it is in the dark."

"I didn't kiss you," answered Herbert, looking angrily around in the crowd. "I only wish I knew who it was—I'd teach him!"

"Ehbert," sighed the girl, "you couldn't teach 'im nothing!"

.....

The business man waited outside the public telephone booth, trying to restrain his rising temper. At last, seeing the lady fumbling with the pages of the directory, he opened the door and volunteered his service.

"Can I help you find a number, madam?" he enquired politely.

"Oh, no, thank you very much," she replied. "I'm just looking for a name for my baby."

.....

An old breed of chickens he considered best. "All kinds has merits," he replied. "De witte ones is de easiest to find but de black ones is de easiest to hide after you gits 'em."

.....

Mrs. Newlywed—"How do you cook pork and beans?"

Mother-in-law—"That isn't the question, my dear. How do you get them?"

Canadian Scientists Help To Perfect The Most Powerful Explosive Used In The War

(By Jack Brayley, Canadian Press Staff Writer)

CANADA'S quiet band of chemical scientists haven't all sat on a flying powder keg like one Montreal doctor but many of them have taken part in exciting laboratory adventures resulting in handy contributions toward development of the United Nations' newest explosive. Munitions Minister Howe has described it as the "most powerful explosive" developed during the war.

The Montreal doctor on the staff of the Allied War Supply Corporation, Montreal, is youthful, slim, mild-mannered and doesn't go around talking about his wartime job. He refused to allow his name to be used and his work would have gone unseeing if it hadn't been for his "powder keg" ride across the Atlantic in the early months of the war.

Some of the details of that "not unexciting" ride, as he describes it, were revealed for the first time now, and the story of the ride goes with the story of the development of an explosive now dealing destructive blows at the Axis. Many details are omitted because enemy chemists are known to be striving to achieve similar results.

For many years certain ingredients were known to produce "super-explosions." Several nations worked on their development as to practicability and economy in production and chiefly on means of "taming" them to perform their death-dealing job without injury to producers or armies who use them.

The "taming" process was a difficult one and many times research work was given up as "too dangerous." In England some of the most important explosive research scientists were killed in attempts to find a means of practical production. This held up research in that country for five years.

A young United States student at McGill developed a chemical reaction necessary to the "taming" process. This launched new research work in Britain and the United States. Both countries contributed the lion's share of the development but, the Montreal doctor admitted cautiously, Canada added to the pool of United Nations resources.

When Canadian scientists finally hit upon what appeared to be a practical process, a quantity of the material was made, and, as there was need for speedy information and speedy decision, the Montreal scientists decided to fly a sample to England. He wetted down the material as a precaution and carefully packed 20 pounds of it in glass jars and placed them in a case. Then he passed the case to a ferry command pilot who gingerly placed it on board a trans-Atlantic service plane.

At that time all the properties of the new development were not fully known and there was some doubt as to what would happen if the plane were forced to seek very high altitudes where freezing conditions might be encountered. And that is where the Montreal doctor "sat on the powder keg." He figured the warmth of his body would be sufficient to balance the temperature and keep the watered explosive from freezing and perhaps exploding.

Everything went well until they arrived over the British airport destination. But heavy clouds obscured the landing field and for more than quarter of an hour they circled the area.

The doctors considered the possibility of attaching a parachute to the explosive before dropping it but before he had a chance to make up his mind the pilot reported the field in sight and a safe landing was made.

Since that day there have been improvements on the Canadian development and the present product, being manufactured in United States and Canada and now going into Canadian-made depth charges, are being exported in the raw, is a pool of ideas.

"What does it look like anyhow?" asked a reporter.

"Like this. This is it," answered the doctor producing a small jar and smiling as the reporter backed away.

Potash is used in making gunpowder, hand grenades and aviation gasoline.

The Chinese Hung society has been in existence since 386 A.D.

New Cap Badge

A new cap badge for all ranks of the Canadian Infantry Corps is announced by National Defence Headquarters. The badge is of bronze, having two crossed rifles upon which a double maple leaf is surmounted with the Imperial Crown. Below is a scroll inscribed "ACER", the Latin botanical term for Maple. It also may be interpreted to mean keeness and strength. These cap badges will be issued to reinforcements of the Canadian Infantry Corps in Canada for wear until such time as they are posted to their Battalion or other unit when they will adopt its regimental badge.

correspondence before being permitted at large again. The answer is simple: What your friend wants to hear from you is not something he can read in the daily paper. He is interested in you: what you are doing and what you are going to do and what you think. If you don't happen to have done any thinking you can leave that part out; after all, if you are well enough acquainted with a person to write him a personal letter there is probably no use in pretending that you can think. Tell him instead what you do. Tell him if you slept well, tell him your dreams, tell him what you had for breakfast, tell him about the dog that barked most of the night in the yard next door. Tell him about seeing a fellow you both went to school with and how he has made a lot of money or gone to jail or both. Tell him all the friendly gossip about all the people you both know. Write: it is the cheapest and most effective way of conferring pleasure on your friends. Every person who reads this has someone in mind to whom they should have written long ago. Obey that impulse; do it now.

Editorial note: The article above was in a recent issue of "The Western Producer", Saskatoon, and is from the pen of Harris Turner in his S.E. Corner. Being a blind veteran of the last war we are sure Harris would say "write many letters to the boys overseas". They help to keep their spirits up to know they're remembered.

R.C.A.F. Sentinels Keep Pacific Lookout

Facing a stiff sea breeze, parka-clad LAC Jim Caskey of St. Paul, Alta., takes his turn at the lookout on one of the storm-swept promontories which stretch out from Canada's west coast. At lonely outposts along the coast, men of the Royal Canadian Air Force coast watch service keep constant vigil, alert for any sign of invader or raider. Should any such stranger come in view, the word would be flashed to fighter stations whence aircraft would be dispatched to meet the intruders. Loneliness is the lot of the coast watchers, living in log cabins of their own construction, and spending months out of touch with civilization.

Aircraft Production Of The Allied Nations Now Greatly Exceeds That Of The Axis

(By An Air Correspondent)

IN modern war the relative strength of rival Air Forces on any front usually provides a valuable guide to the position of the war as a whole. Today, on almost every front, the Allied Air Forces are gaining the ascendancy and the war as a whole is swinging markedly in favour of the Allies. This relative strength in the air depends on three factors: production on the home front, technical quality of equipment and crews, and efficiency of the ground organization from the front line back to the main bases.

There is no doubt that German, Italian and Japanese production combined is now much less than that of Great Britain and America.

As far back as November, 1941, the British Prime Minister announced that we in this country, by our own gigantic efforts, had reached air parity with Germany. Since that date the graphs of our production has risen steadily. Output of aircraft in September, 1942, to take only one instance, was 18 per cent. higher than that of the preceding August.

We know that German and Italian production combined with that of the enslaved nations building aircraft for them is somewhere around 3,800 machines a month. Of these rather less than 2,000 are combat types, while the rest are transports and trainers of various kinds. Japanese production is believed to be less than 1,000 aircraft a month, so that American production alone exceeds that of the three Axis powers combined.

Furthermore, the enemy has been losing aircraft at a great rate in Russia, over the Mediterranean and in the Pacific during the past few months. Russian reports claim the capture or destruction of nearly 1,000 aircraft a month along the vast front from North of Leningrad to the Caucasus. Many hundreds of aircraft have been destroyed in the Mediterranean area, and Japanese production cannot have kept pace with the recent losses over the Solomons, New Guinea and the Aleutian Islands.

Thus all the fronts are linked closely by the fact that the whittling down of the enemy Air Forces on each of them affects the general air strength of the enemy and his power to make war.

On the technical aspect the United Nations have much cause for pride, though none for complacency. In almost every category there is either a British or an American aircraft which has a great technical advantage over its equivalent enemy type.

Finally on the ground the organization of supply lines and main bases with ammunition, spares, fuel and oil is an essential link in the chain. The organization of bases in Great Britain is probably the best in the world, but the supply lines across the Atlantic are hazardous because of the U-boat menace. Atlantic communications form the weak link in the chain at present and upon them Allied air superiority depends.

However, in the broad pattern of the war Allied air strength is increasing steadily over that of the Axis. The enemy's shortages are becoming obvious on many fronts. The most valuable air action of all is always to strike the enemy at his weakest spot. In doing this a great part of the air effort may appear tactically independent. In fact it is strategically giving direct support to the land and sea forces in such a way as to prepare for the final advance which will achieve victory everywhere.

The Alternative

Anyone Whose Signature Is Illegible Should Have It Typed

Every business man constantly has the experience of receiving letters bearing a scrawl at the bottom which serves only to arouse the curiosity of the addressee as to the name of the writer. There are many signatures which are completely illegible, and they lead to annoyance and embarrassment.

One cannot compel correspondents to write their names so that they may be read, but it would be good business on the part of these scrawlers to do something to remedy the situation.

The obvious course is to have the name typed in on the letter.—Wind-Jar Star. 2318

Pert Pansies In Filet Crochet Set

by Alice Brooks

Give added distinction to your furniture—and make it wear better—with this lacy filet crochet set for a chair or divan. The pert pansies make a decoration to enhance any chair and are something new in filet crochet. Make a buffet set or scarf ends, too. Pattern 7537 contains charts and directions for set, stitches, materials needed.

To obtain this pattern send twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermott Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number. Because of the slowness of the mails delivery of our patterns may take a few days longer than usual.

Many butterflies never eat at all during their lifetime.

The climate of a place is its average weather.

The World of Wheat
by H. G. L. Strange**WORLD LACKS FOOD**

The United Nations Conference of 45 nations has just concluded its investigations at Hot Springs, Virginia. They find:

1. That there is and will be for long to come a scarcity of food in the world.

2. That while it is desirable to improve the nutrition of the people of the world, a much more important goal for future years is to bring about freedom from sheer hunger from which millions of people have always suffered.

3. That there are no real surplus of foodstuffs in the world.

4. That production of food must be greatly increased in the future.

That surplus foodstuffs available in any country must quickly be made available to the hungry people of other countries.

6. That to bring about a better distribution of foodstuffs, the Conference went on record as opposing tariffs and other artificial barriers to international trade.

This is all splendid news for the prairie farmers, for it indicates a return to sound economic and humanitarian thinking which the governments of the world, and most of the people, abandoned during the past 20 years.

There will, undoubtedly be much opposition to these recommendations. Certain interests will still desire to have many kinds of goods made uneconomically in the United States and Canada behind tariff walls. Farmers and all of us, therefore, will have to press our Canadian government to lower tariffs so as to permit the free flow of foodstuffs, goods and commodities throughout the world.

ITEMS OF INTEREST IN THE WORLD OF FOODSTUFFS

Since war started British farmers have increased oats and barley crops by more than 50% and have raised vegetable production from 2,500,000 to 4,000,000 tons. Crop conditions in Europe point to a harvest greater than in any previous war year. Ecuadorian rice exports in 1942 reached an all-time record of 90 million pounds as compared with the previous record of 50 million pounds.

Australia's 1942-43 wheat crop is placed at 155,820,000 in the final official estimate as compared with last year's harvest of 154,080,000 bushels. The French wheat crop was about 235,000,000 bushels last year as compared with 335,000,000 bushels harvested the year before war began.

Old Potatoes Set Price for New

New potatoes are ordinarily an early summer table luxury. This year, to relieve the current shortage of old potatoes, the price of new potatoes must not exceed the lawful ceiling price for Canada, No. 1 grade old potatoes, under order of the Wartime Prices and Trade Board, effective June 7.

Growers and consumers will be protected through subsidy paid up to August 31, by the Commodity Stabilization Corporation under direction of the Wartime Prices and Trade Board.

**"VENTURA" LIGHT BOMBER IN ACTION**

Lockheed "Ventura" light bombers were first officially mentioned as being in service with the R.A.F. after the heavy daylight raid on the Philips Radio Works at Eindhoven, Holland, on 6.12.42. The "Ventura" is a development of the Hudson-first American-built aircraft to go into operational service with the R.A.F. in this war - but it is faster and has several points of difference. The most characteristic feature of the "Ventura" is the design of the underpart of the fuselage, the rear of which is stopped up rather like that of a flying boat. It has two Pratt and Whitney twin wasp engines and carries a heavier bomb load than the Hudson. It is manned by a crew of four.

Picture shows: Head-on view of the Lockheed "Ventura".

Your Income Tax....MINISTER OF NATIONAL REVENUE
CANADA**FELLOW CANADIAN**

I would like to remind the two million taxpayers of Canada of their obligation to file a 1942 Income Tax Return before the 30th of June.

This year, the forms have been simplified so that they can be completed with a minimum of time and effort.

The Income Tax dollars that Canadians pay are necessary in our present struggle. They are an investment in our future peace and security. They are fighting dollars....Victory, dollars.

Income Tax is fair to all, as each person is taxed in accordance with his ability to pay.

There is no easy way to win a war. Almost half the costs of this war must be paid by taxes. I know that the Income Tax is not a pleasant burden, but I also know that to win the war, Canadians are willing to fulfil their obligations....to pay the price and to shoulder their responsibilities with the same unbeatable spirit as shown by those who have gone from our shores to fight.

Minister of National Revenue.

Notes From the West

The Eikton Willing Workers met at the home of Mrs. L. Barnard last Wednesday, when a comforter was tied for the Red Cross. The next meeting will be June 23rd, at the home of Mrs. D. Evans.

The W. I. conference that was to have been held on Friday, June 11, was postponed till Tuesday, June 22 in the Knox United Church, Didsbury.

Mr. and Mrs. Stikenne left last week for a two month's visit in the States.

Don't forget the dance at the Rugby Hall, on Friday the 18th, in aid of parcels for boys overseas.

Messrs. O. E. and A. Krebs received a call to Calgary last week, to the bedside of their father, who had suffered a severe stroke.

Lone Pine Notes

Mrs. Joe Clark is spending a week in Calgary with her daughter-in-law, Mrs. Jack Clark, and several friends there.

Mr. and Mrs. Ralph Eton, of Acme, spent Sunday at the Thompson home.

Don't forget the community picnic to be held July 1st, at the Hall, with a good dance at night, sponsored by the local W. I.

Mrs. Fred Nelson and family are visiting for a time with her father, Mr. Hugh McLean.

Mr. and Mrs. Alfie Thompson, Donald and Beverley, spent the weekend in Calgary.

Owing to the bad roads, only a few attended the halibut meeting, June 11, so the board will remain as is, until 1944.

All roads will lead to Burnside school this Friday, June 18, for the Junior Red Cross dance.

Mrs. Chris Ehselt visited her parents in Calgary last week.

Bergen Notes.

Mr. Eric Lyle is expected to be home on a furlough soon.

Mr. Chas. McCurrough and son, Don, are home on a short visit.

Harold Clemens has taken over "Bill's" store at Bergen, and seems to enjoy better health and a more cheerful outlook. Mrs. Clemens is also here, having spent some time visiting friends.

Mrs. John Mjølness' eldest daughter, Madeline, visited Bergen recently.

Mrs. Mary Payne visited her parents, Mr. and Mrs. Ira Gamble, at Bergen, for a few days, while her mother took a trip to Didsbury.

Bill Mjølness is home again. He fell into a cellar in Crossfield and was taken to a Calgary hospital where he was ill for three weeks, suffering from severe contusions. He is feeling much better.

The stork has been busy around here, distributing baby girls. To Mrs. Henry Nielson, Mrs. Eugene Lindzey and Mrs. Leonard Mekkelborg. We congratulate them. Boys are rationed.

Mrs. John Haug is feeling better, for she has been in Didsbury suffering from heart attacks.

Jimmy Haug was home on a short visit before reporting for military duty.

We appreciate the A.C.H. observations, quips and jokes.

Calgary 2nd in Victory Loan Competition

Calgary's Fourth Victory Loan "Flame of Freedom" ceremony at Mewata stadium on May 12, won for the city second place in the National War Finance Committee's contest for the best promotional idea to support the loan campaign in the classification for cities of its size, according to results announced from Ottawa recently.

Calgary was second only to Saskatoon in Class D, consisting of cities with population between 30,000 and 100,000.

By
 Dr. K. W. Neely
 Director, Agricultural Experiment
 North-West Line Elevators Association

Seeds, Weeds and Services

The Line Elevators Association has completed germination tests on 11,000 samples of farmers' seeds, on increase over last year of nearly 21,000. All samples have been tested twice, and many have had three tests. This means a total of nearly 25,000 tests and, if you like big figures, 2,500,000 seeds! Not one complaint has so far reached the office.

Once, again, we take the liberty of reminding farmers that if they cannot identify all weeds on their farms, they may be making serious trouble for the future. Small patches of perennial weeds can be destroyed cheaply; but, later on, eradication may cost as much as the land is worth. It is only necessary to collect good specimens, including flowers and roots and take them to the nearest line elevator agent. He will forward them to us, and we will identify the weeds and indicate whether or not they are likely to be serious pests. Or, weeds may be sent to any Dominion Experimental Farm, Provincial Department of Agriculture or University. The importance of this matter cannot be over-stressed.

The Line Elevators' weed bulletin, "An Illustrated Guide to Prairie Weeds," is available through line elevator agents or by writing to the Agricultural Department, The North-West Line Elevators Association, Winnipeg.

It is now nearly four years since the Line Elevator Companies organized this Department to serve prairie farmers. Each succeeding year has brought increased demand for services and publications; this is an ample reward.

The "Flame of Freedom" ceremony was arranged with the participation of the three armed forces and citizens of the city.

THE PIG THAT WENT TO MARKET

Canadian bacon and foodstuffs of every conceivable kind are being shipped in tremendous quantities from Canadian farms to beleaguered Britain. Food, no less than fighting men and machines, is essential to final victory. Food production is the first importance and Canada's army of farmers is doing its job well.

LOANS TO FARMERS . . . Do you need cash to run your farm to peak war production? Your enquiries are invited and will be carefully considered by your local branch Manager.

The Royal Bank of Canada
 DIDSBURY (Alberta) BRANCH, F. DUNLOP, Manager

**If you have anything to Sell - -

Carrying the load in War and Peace

WORLD HAPPENINGS BRIEFLY TOLD

The Canada Gazette disclosed that U.S. army has established a base at Pulpis Harbor, close to Prince Rupert harbor on the B.C. coast.

The German authorities in Holland used widespread farmers' strikes as an excuse to cut Netherlands' meat rations. Aneta news agency reported.

An admiralty communique said 30 to 40 enemy warships and auxiliary vessels were sunk or severely damaged by mines during the Tunisian campaign.

Britain is collecting scrap iron and steel at the rate of 5,280,000 tons a year. Lord Portal told the British house of lords. Railings alone yielded 1,600,000 tons.

Canada and the United States have reached an agreement whereby their reports to the other American republic will be "jointly programmed" to assure their use in the war effort.

Alplane windows made from lunath, a transparent cellulose acetate-base plastic, is being used in U.S. army and navy warplants to protect crews from the burning rays of the sun.

To prevent the production of any anti-freeze, which might damage automobile radiators, the manufacture of this commodity has been placed on a permit basis, the munitions and supply department announced.

Czechoslovak quarters in London have received information that an innkeeper in a Czech village near Prague has been executed for listening to BBC news bulletins and allowing villagers to gather at the inn to listen.

BARRED FROM SERVING

There are 650,000 physically fit men in the draft age bracket in the United States so illiterate that no branch of the service will accept them. Dean William F. Russell, of Columbia University, told a state-wide conference of school principals at Sacramento, Cal.

Spices were known in China as far back as 2,600 B.C.

The best cleaning agent for rubber is alcohol.

Playtime Wardrobe

By ANNE ADAMS

Your small "play-girl" can romp in perfect comfort in this complete and varied wardrobe. Anne Adams has included rompers or overalls with flared or puffed sleeves, and a cool sunsuit—all in one simple to use pattern. Heart pockets are fun!

Pattern 4366 is available only in children's sizes 2, 4, 6, 8. Size 6, rompers, takes 1 1/2 yards 35-inch, 1/2 yard contrast; overalls, 2 1/2 yards 35-inch; sunsuit, 1 1/2 yards 35-inch.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man. "Because of the slowness of the mails delivery of our patterns may take a few days longer than usual."

A resident family of janitors lives, eats, and sleeps in each Brazilian theatre.

Believed In Fate

Chinese Seaman Did Not Worry When Adrift In Atlantic

For 132 days a 25-year-old Chinese sailor lived by little more than his wits on a life-raft in the rolling Atlantic.

Thus, Poon Lim set a new survivor record in the battle of the seas. Poon apparently is the only one who survived out of 55 men aboard a torpedoed English merchantman. The ship went down some time last November.

The Chinese seaman lay stark naked on his life raft—catching fish with a make-shift hook. Even after one ship and seven planes passed him by, he wasn't worried. The Chinese, he pointed out, don't worry. Poon said simply that he was ready to die if that was what fate had in store for him.

When the little 140-pound steward was washed over the side of his ship, he climbed aboard a floating raft. He was the raft's sole occupant. There was enough food and water to last for 30 days.

After that, he took a spring out of a flashlight and fashioned it into a hook to catch small fish. He used the small fish for bait to catch larger ones.

Poon said eating raw fish got to be a habit—just as eating rice in China does. Raw fish, he explained, tasted better than fish he had dried in the sun.

The Chinese seaman sang folk songs to pass away the time. And he told the time of day and the day of the month by reading the moon.

"When the moon was full," said he, "I knew it was the middle of the month."

Poon was picked up within sight of the South American coast.

From Sailing-Ship Days

Reason The British Seafaring Man Was Called A Limey

When the Allied armies met in Tunisia the first words of greeting, we are told, came from an American sergeant, who hailed a British patrol with the phrase—"Hello there, Limey."

Many people were asking why this particular word should have been used. For the answer we have to go back to the old sailing-ship days when every British craft carried a supply of lime-juice which was issued to the crew daily as a preventive for scurvy. Thus it came about that any British seafaring man was dubbed a "Limey."

But the British were not the only nationality to have a nickname. The Americans were, of course, Yankees. Belgians, Hollanders and Germans were all grouped as Dutchmen, and any sailor from the Mediterranean was called a Dago. The Northern peoples Danes, Swedes and Norwegians, were classified as "Skandeevians," but the most delightful of all was the Nova Scotian, who went under the name of "Bluenose."—Helfast News-Letter.

MORE RAW MATERIALS

Food Minister Lord Woolton told a press conference the North African victories are expected to provide the United Nations with phosphates and such foods as dried fruits, coffee, cocoa, ground nuts and palm oil. He also predicted valuable raw materials would be secured.

HARD ON THE BOYS

All this end arithmetic too, the wee fellows won't like it. A British National Council of Women committee has recommended that school boys—as well as girls—should have classes in sewing, mending, laundering and home nursing.

Fastest Fighter And Bomber In The World

Most versatile aircraft in the world, the Mosquito is in active service as a long range day and night fighter and intruder as well as a day and night bomber. The Mosquito Fighter (shown above) has four 20 mm. cannon and four .303 machine guns, all mounted in the fuselage nose, giving highly concentrated fire. The Mosquito Bomber carries 2,000 lbs. of bombs with a fuel range which brings practically the whole of Germany within its reach.

The design of the Mosquito was not commenced until after war began and it represents a world record from drawing board into operations against the enemy, namely 22 months. Because of its plywood construction, the de Havilland Mosquito is the most widely dispersed in manufacture of any war aircraft, utilizing hundreds of sub-contractors. The de Havilland Aircraft world-wide formation of aeronautical enterprises in Britain, Canada, South Africa, India, Australia, New Zealand and South America in operation for many years before the war in the manufacture of civil and commercial aircraft, was in a fortunate position to turn all their facilities and experience to production for the Allies of the world's fastest aircraft.

Performance information on the Mosquito has not been released, but Mosquitoes fly non-stop to Russia to lunch, and back to Britain the same afternoon.

BREWING INDUSTRY OF ALBERTA

51,321 individual shareholders own Canada's Chartered Banks. The average holding is 28 shares. Most of these shareholders are Canadians.

The wide distribution of bank ownership is indicated by the fact that 36,574 individuals, living in all parts of Canada, hold shares in the Chartered Banks of Canada. Of the remaining shareholders, 8,987 live elsewhere in the British Empire.

Some further facts about Canada's Banks:

There are 4,369,740 savings deposit accounts in the Chartered Banks of Canada, averaging \$391 each. Safeguarding the funds of depositors is a primary function of commercial banking. Banks keep themselves in such a position that anybody

going to the bank to withdraw his savings can get his money. Banks, like any other business, exist because they provide service which a community needs and is willing to pay for at a rate which will yield a reasonable return.

Every day, bank loans are helping Canadians in all walks of life and in all parts of Canada to profit from their individual enterprise and industry.

THE CHARTERED BANKS OF CANADA

Evangelical Church Notes

Father's Day will be observed at the morning service on Sunday, June 20, at 10:30 a.m. 'A Father's Failure' will be the theme. David mourned for his son Absalom and wished that he could have died for him.

The Sunday School will present the annual Children's Day program at 8:00 p.m. The offering will go for missions. We invite all to worship with us on Sunday, as this day will stress the value of a godly home-life.
